

To Whom it may concern,
I have been listening to XM Radio for close to 2 years now and I think its been the greatest thing to hit the market since cable. Now i hear that NAB is trying to ban local weather on XM. If this is correct, you peopl have to think about what you are doing. I pay my 9.99 a month and expect certain things for it. Its just like if i had showtime or HBO on my cable bill. It is a paid service, its not free, which means that there SHOULD be things that not all local radio statiosn provide. And, to say the least, dont like have to sit and listen to 20 partys that are going on at clubs for 20 minutes before i can hear the news or local weather. Futhermore, I have hated the local radio stations lately (except for 89X) because of the way they have their system set up. I work at a Best Buy in southgate, Mi, where we SELL XM. I am just one of 1.8 million satalite radio fans/listeners and i say let XM keep their instant traffic and weather. ONLY XM ans Siruis fans can listen to it anyways, and their sales are not even centered around it. Don't let people that are scared of competition and who are frightened by new things. My name is Nichoals Cady, and i say let XM be.
